Infor LN Manufacturing Interview Mastery

The Definitive Preparation Companion

10.5 | 10.6 | 10.7 | 10.8

One hundred and fifty curated questions across BOM, routing, costing, production, subcontracting, repetitive, planning interplay, support and migration — handcrafted for consultants who refuse to be ordinary.

The interview questions, talking points, sample answers, scenarios, and recommendations contained herein are based on the author's professional consulting experience across multiple Infor implementations, support engagements, upgrades, and migrations. They are intended as a study and preparation aid only. Specific behavior, screen labels, table names, parameter codes, and process steps may vary between feature packs, customer-specific customizations, and country localizations.

DISCLAIMER & READER ACKNOWLEDGEMENT

Use With Care

Reader's responsibility · Author's intent

This book is a **preparation companion**, not an Infor product manual. Every effort has been made to ensure accuracy, but Infor products evolve through feature packs, country packs, and patches; the same module may behave differently between versions. Always validate behavior against the actual customer landscape, the relevant Infor documentation set, the Knowledge Base on Infor Concierge / Infor Support Portal, and tested results in a sandbox before relying on any answer here in a production decision.

The "expected answers" embedded throughout this book are *talking points* — the kind of language and structure interviewers find credible. They are deliberately not phrased as one-liner cheat-sheet responses. Real interview success comes from internalizing the *why* behind each point and weaving it into your own consulting voice.

A NOTE FROM THE AUTHOR

Manufacturing interviews favour candidates who can narrate a production order's *physical* journey while pinning the *cost* impact at every operation. Practice the flows aloud — feel the materials issue, see the labour book, watch the variance hit the GL. That mental model is what the panel is really testing.

FullOnBaan, the author, and any contributors disclaim all liability for any decision, configuration, project outcome, employment outcome, or commercial result attributed wholly or partly to the contents of this book. By reading further you acknowledge and accept this disclaimer.
